DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (US 5,440,836).

Lee discloses the fountain device and plant receptacle as cited in claims 1-3, 5-8 and 16-20. Lee's device comprises a water reservoir, defined as the collective structure of basins 10, 24, 54, a bottom 12, sides 14, 26, 56 and an open top structure 60. The top structure 60 is defined as open, since communication holes 50 (Lee, Figure 1) render the reservoir open to the external environment. Lee's device further comprises a pump 62, located at the bottom of the reservoir, for pumping the quantity of water within the planter, and sprinkler 40 for discharging the quantity of water. First 28 and second 58 planters are directly attached to, and suspended from an exterior surface of the reservoir at different height locations, said planters are also adapted to catch a portion of the discharged water.

Response to Arguments

4. Applicant's arguments with respect to claims 1-3, 5-8 and 16-20 have been considered but are moot in view of the new ground of rejection.
